

NGUYEN CUONG DAI

Ward 6, District 8, Ho Chi Minh City, Vietnam
0907 165 254 | daingi.nguyen@gmail.com | github.com/dainji04

OBJECTIVE

Motivated final year Computer Science student with hands-on internship experience seeking opportunities to apply front-end development expertise in creating responsive, user-centric web applications. Demonstrated proficiency in modern JavaScript frameworks and full-stack development through comprehensive project portfolio and professional experience. Committed to leveraging technical skills and collaborative mindset to contribute effectively to innovative development teams.

EDUCATION

Saigon Technology University 2022 – 2026 (Expected)
Bachelor of Science in Computer Science Engineering

- Current GPA: 3.3/4.0
- Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Web Development, Software Engineering, Computer Networks

PROFESSIONAL EXPERIENCE

Software Developer Intern 07/2025 – 10/2025
TMA Solutions

- Developed a real-time chat application as a training project, leveraging Socket.IO and WebRTC for instant messaging and peer-to-peer video calls.
- Designed and implemented reusable UI components with Angular.js, focusing on responsive layouts for desktop and mobile devices.
- Optimized front-end performance by identifying bottlenecks and refining state management strategies, resulting in smoother user experience.
- Utilized Git for version control and GitHub for project collaboration, practicing professional development workflows.
- Self-tested and debugged application features to ensure code stability and maintain high standards of code quality.

TECHNICAL SKILLS

Programming Languages:	JavaScript, TypeScript, HTML5, CSS3, PHP (Basic)
Frameworks & Libraries:	Vue.js 3, Nuxt.js, Angular, Express.js, Node.js, Laravel (Basic)
CSS Technologies:	SCSS, Tailwind CSS, Bootstrap, Ant Design, Responsive Design
Development Tools:	Git/GitHub, Pinia Store, Vueuse, Socket.IO, WebRTC
Database Systems:	MongoDB, SQL Server
Animation & UI:	GSAP, Swiper, RESTful API Development

PROJECT EXPERIENCE

Travel Booking Platform

2024

Role: Frontend | github.com/dainji04/Travel_Booking

Technologies: Vue 3, SCSS, TypeScript, Vueuse, Pinia Store, Swiper, GSAP, Ant Design Vue

- Architected and developed comprehensive travel booking platform targeting international tourists exploring Vietnam
- Implemented responsive design with smooth animations and interactive UI components using GSAP
- Built dynamic tour browsing system featuring regional filtering and detailed itinerary presentations
- Designed secure booking workflow with real-time availability verification and user-friendly interface
- Utilized TypeScript for enhanced code reliability and Pinia for efficient state management

Tech Store E-Commerce Platform

2024

Role: Full-Stack Developer | Frontend: github.com/dainji04/ecommerce |

Backend: github.com/dainji04/ecommerce-server

Demo: <https://dainji.vercel.app>

Technologies: Vue 3, Tailwind CSS, Express.js, MongoDB

- Developed complete e-commerce solution for technology products including smartphones, laptops, and accessories
- Engineered product catalog system with advanced filtering, search functionality, and detailed specifications display
- Implemented comprehensive shopping cart system with secure checkout process and payment integration
- Built robust user authentication system with profile management and order history tracking
- Designed mobile-first responsive interface optimizing user experience across all device types

Real-Time Chat Application

2024

Role: Full-Stack Developer | github.com/dainji04/Chat-app-real-time

Technologies: Angular, SCSS, Express.js, MongoDB, Socket.IO, WebRTC

- Developed sophisticated real-time chat application with integrated video calling functionality
- Implemented WebRTC technology for peer-to-peer video communication and audio streaming
- Built scalable multi-user room system with real-time messaging capabilities using Socket.IO
- Created responsive Angular frontend featuring modern UI/UX design principles
- Integrated secure user authentication system with comprehensive room management features
